LOFT CEMENT

The lobby of a hotel is a demanding environment. It's the first point of contact with guests and, from a functional point of view, it's a high traffic area that requires solutions to make the day-to-day work of the hotel easier. HI-FLOOR is your perfect ally: it remains unchanged, resists all kinds of wear and tear, and does not deteriorate. Any maintenance manager's dream.

NATURAL OAK

Wood in the bathroom? In the kitchen? Yes, at FLINT, we make it possible. So get ready to bring the warmth and beauty of the noblest of materials to where it was not previously possible. Neither water leaks, moisture nor steam have an adverse effect on our laminates with anti-allergic properties.

RUSTIK OAK

Wood brings us closer to nature. There's nothing like kicking back and enjoying a few moments of relaxation away from the hustle and bustle. HI-FLOOR laminates enable you to offer your clients a complete experience. A calm and pleasant atmosphere around and under your feet.

BLOCK WALNUT

Shhh! Time to focus on the conference. Quiet and stable, HI-FLOOR has a manual clicking system that makes installation extremely simple and fast. You only have to worry about the audience being silent. And forget about bothersome repairs due to wear and tear.

**WATER-PROOF**  
DIMENSIONAL STABILITY

MAXIMUM STABILITY

Hygienic, easy to clean and fire-resistant. Flint's HI-FLOOR not only withstands the day-to-day rigours of hotel life, but does so with style, always retaining its appearance like the first day.

SOPHIS WALNUT

Put FLINT floors to the test against the frenetic pace of restaurants crowded with customers, the dragging of chairs, cutlery falling from tables and the coming and going of waiters. Relax. At closing time, there won't be any scrapes or scratches. Everything will be in order.

GLIMMER OAK

Time to get fit in the gym. FLINT's new laminates resist all kinds of impacts and can be quickly cleaned with ordinary cleaning products. Like the most common of floors, but with extraordinary results.

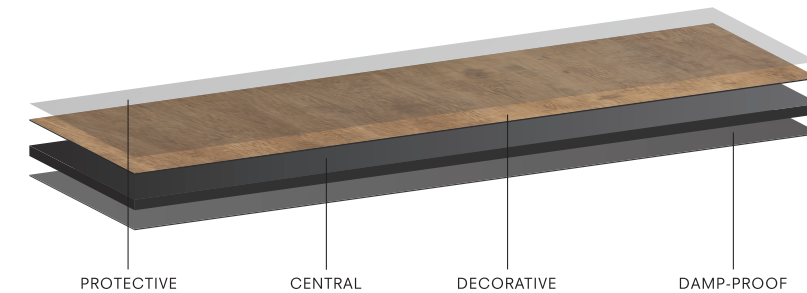

FILONE ELM

## HPB

**HIGH PRESSURE BLOCK**  
HPL INSIDE

**Compact synthetic laminated flooring**

FLINT's HI-FLOOR is composed of cellulose fibres that have been impregnated with thermosetting resins and subjected to high pressure and high temperatures in a single process. The resulting block, with almost twice the density of other laminates on the market, is extremely stable and offers outstanding water, impact, fire, pressure and wear resistance.

**WEAR RESISTANCE:** AC5 AND AC6  
**IMPACT RESISTANCE:** IC4  
**FIRE RESISTANCE:** BFL-S1 AND CFL-S1  
**SLIP RESISTANCE:** CLASS 2  
**STAIN RESISTANCE:** GRADE 5  
**RESISTANCE TO STEAM:** GRADE 5  
**SURFACE HEAT RESISTANCE:** GRADE 5
